contact@anudit.in

Objective

Currently looking for a job in an organization with team where I can utilize my potential to learn and grow.

Education

School/College	Qualification	Year	Percentage/CGPA
University School of Information & Communication Technology GGSIPU	B.Tech (Ongoing)	2013-17	73.06 %
Mayur Public School CBSE	Intermediate/+2	2012	82.20 %
Mayur Public School CBSE	High School	2010	8.8

Projects

Google Summer of Code 2015

(May 2015 - August 2015)

New API: Open Supporter Data Interface Implementation

- Designed and implemented REST APIs for *CiviCRM* to enable interoperability among various other association management systems.
- Ensured compliance with *Open Supporter Data Interface* (OSDI) for lower integration costs and data consistency across other platforms.
- Worked closely with assigned project mentors Joe McLaughlin (California, US) and Eileen McNaughton (Wellington, NZ) to understand design requirements.

Project Link: <https://github.com/anuditverma/org.civicrm.osdi>

Airtel Suvidha

(During 24-hours Hackathon, 20 May 2017 - 21 May 2017)

Airtel Suvidha: A Recommendation Engine

- Awarded 1st prize in *Airtel WHack* 24-hours Hackathon, worked in a 4 members team to develop a recommendation engine for *Airtel*.
- *Suvidha* is a data analysis tool that studies user's usage patterns, recommends optimal plans based on the pattern that provides *Airtel* a better insight about their product's performance.

Details: www.hackerearth.com/sprints/airtel-hackathon/dashboard/Ignited_Minds/submission/

IoT Smart Home System: Undergraduate (B.Tech) Project

- Developed an Internet of Things (IoT) based Smart Home System, a webapp as a monitoring tool and mobile app for controlling the smart home devices.
- Smart home occupants can control AC's temperature, thermostat settings, lights and security doors.
- Utilized Raspberry Pi as a server for hosting the smart home system connected to the relay which then further communicates with these connected devices.

MAA (Medical Ambience App): Avaya Hackathon (6-7 May 2017)

- Utilized Avaya's SDK to create an Android App in a 3 members team.
- This app aggregates and analyses patient's vitals' feed and generates a Health Score Index (HSI) for doctors, in order to monitor patient's health.

Career Guidance & Placement Portal (March 2015 - October 2015)

- Worked with GGSIP University to develop a centralized portal for student placement activities and updates.
- Designed the overall theme and UI including login & members' login portal.
- Designed an upload handler to facilitate uploading process for students' resume.

TechSpace (Technical Club of USICT) Website (Oct 2015 - Nov 2015)

- Designed and developed the website for Technical Club of USICT which aims to bring all the clubs' activities on one cohesive platform.
- Developed registration/login portal using PHP, CSS and JavaScript for students interested in their choice of clubs.
